06 | SECURITY IN STATION AREA

07 | ABOUT US / CONTACT

Foundation 2002

Customer specified  
video surveillance  
systems

OCR development  
since 2009

Over 100 customer

## OUR RANGE OF SERVICES

Process surveillance and perimeter  
protection (Power plants etc.)

Biometric facial recognition

Checkpoint-measuring portal for  
wayside train monitoring

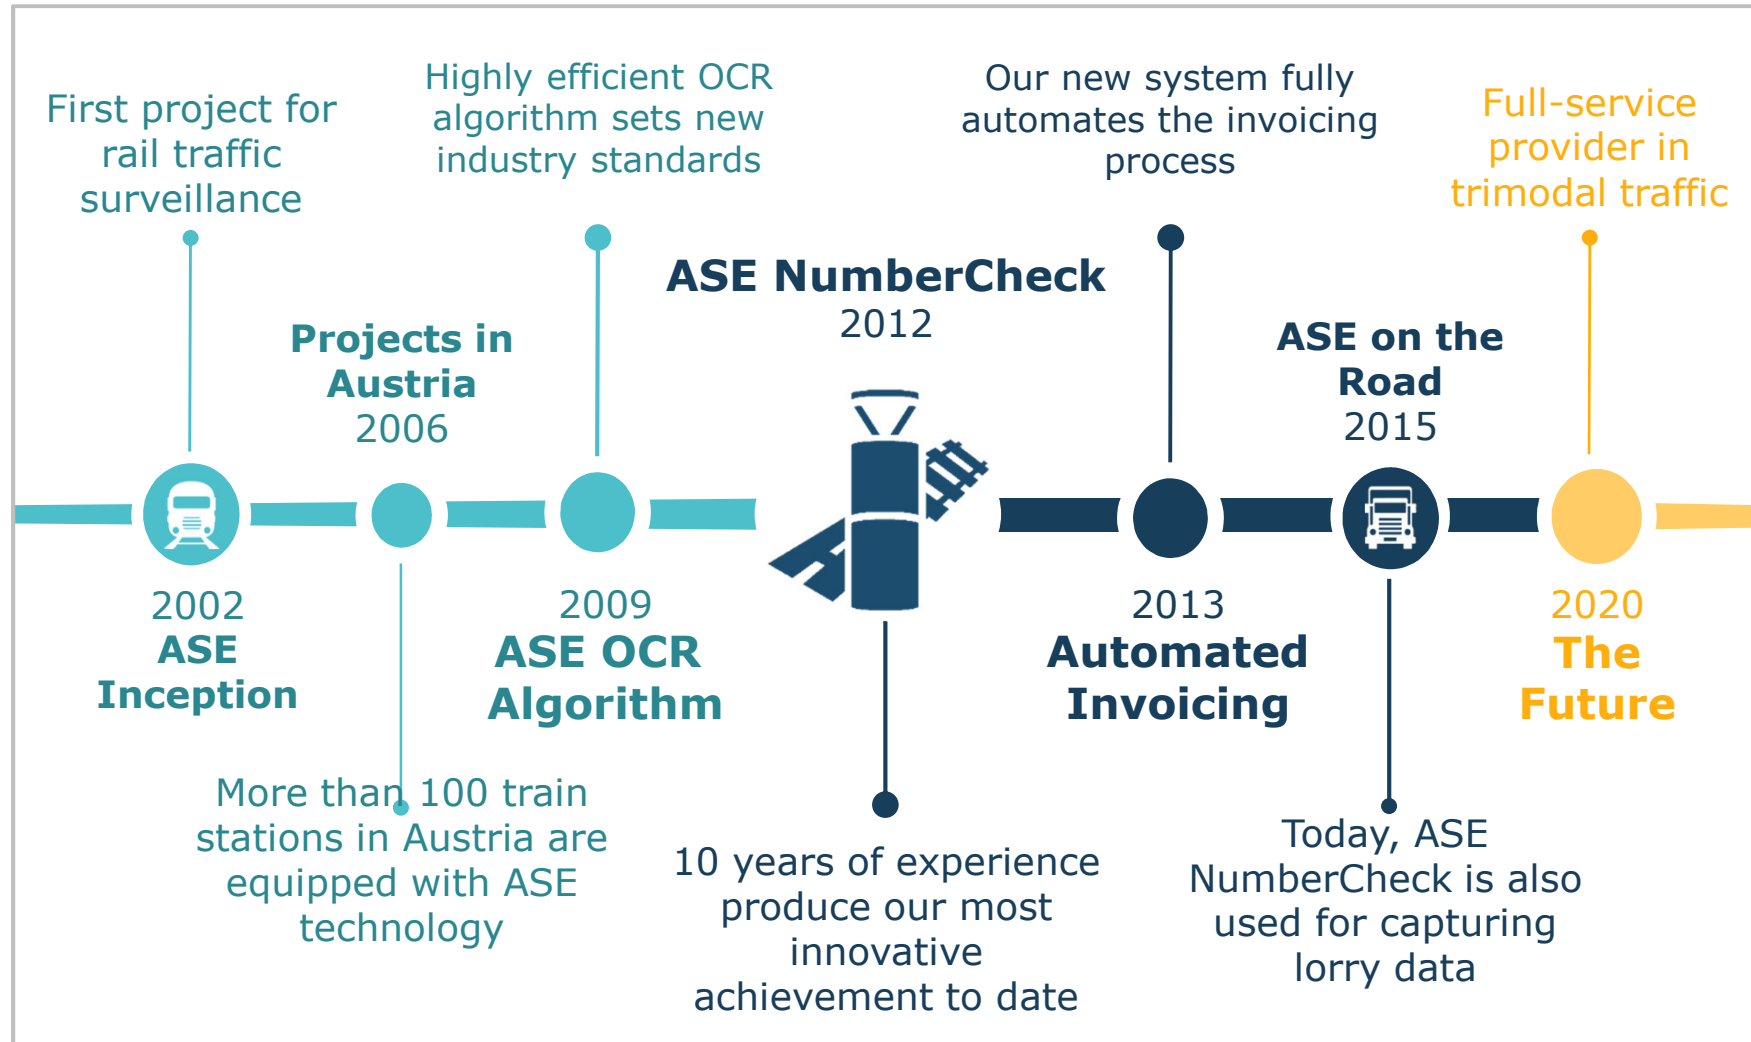

Surveillance in station area

UIC-wagon number recognition

Process optimization for combined  
transport / goods traffic

# 01 | OUR DEVELOPMENTS IN RAILWAY SECTOR

**02 | NUMBERCHECK – VIDEO GATE**

03 | CHECKPOINT – MEASURING PORTAL

04 | PANTOGRAPH – MONITORING

05 | TUNNEL MOUTH SURVEILLANCE

06 | SECURITY IN STATION AREA

07 | ABOUT US / CONTACT

Our solution

# 02 OCR-GATE „NUMBERCHECK“ DETECTION AND DIGITIZATION OF VEHICLE DATAS

NYKU 2938412 22G1      31 81 665 0 286-0

91 80 612015106 D-DB      K-BE 5818

# 02

Our solution

## OCR-GATE FOR RAIL

Optical detection of wagon numbers

Detection of dangerous good signs and numbers

Train monitoring

Automatic image data handling

Status detection / as-is documentation

Detection of goods, tank and passenger cars

Interfaces to higher-level software systems

Interface to track scale systems

Data synchronisation

Reading LOB

Detection break handle

# 02

## 7 MODULES FOR CUSTOMER SPECIFIED SOLUTIONS

- M1** ASE NUMBERCheck
- M2** Container number identification
- M3** Hazardous goods identification (numbers and signs)
- M4** As-is documentation and archiving
- M5** Axle sensors
- M6** Automated TOC matching
- M7** Automated invoicing

### ASE NUMBERCheck pillar

Illustration

**SUBSTANTIAL INCREASE IN REVENUE**  
**EXTENSIVE COST SAVINGS**  
**SMALL INVESTMENT**  
**FUTURE-PROOF TECHNOLOGY**

**THE FUTURE OF TRIMODAL TRAFFIC SURVEILLANCE HAS ALREADY ARRIVED**

# 02

ASE Technology – Modul description

## ASE NUMBERCHECK AND WHEEL AXLES SENSORIC

Reliable identification, image processing and plausibility check of UIC wagon numbers, Russian wagon numbers, locomotive types, and more.

Wheel sensors capture wheel shelf marks and number of axles and automatically report the affected wagon

### ASE NUMBERCheck

Vandal resistant housing

### Wheel sensors for capturing:

- Direction of traffic
- Speed
- Number of axles
- Number of wagons

- ✓ **Identification rate >95 %**
- ✓ **Fast installation**  
Without closing tracks
- ✓ **Modular design**  
flexible adjustment
- ✓ **Easy integration**

M1

M2

M3

M4

M5

M6

M7

# 02 ASE Technology- Modul description

## DETECTION OF CONTAINER NUMBERS AND DANGEROUS GOODS

**Reliable identification, image processing and plausibility check of CNT BIC container numbers**

**Detection of dangerous good signs/numbers and vehicle numbers**

Identifies CNT BIC container codes (BIC/ILU)  
 Automates data matching  
 Interfaces with parent logistics systems

Identifies ADR warning signs  
 Identifies hazardous goods signs  
 Matches data

- ✓ **Higher throughput**
- ✓ **Registration, steering of trucks and trains**
- ✓ **AS-is documentaiton**
- ✓ **Process optimization**

# 02

ASE Technology – Modul description

## AS-IS DOCUMENTATION AND ARCHIVING

enables searching for wagons and complete trains by day, time, arrival, departure, and UIC numbers

Archives 360° views of passing trains & wagons

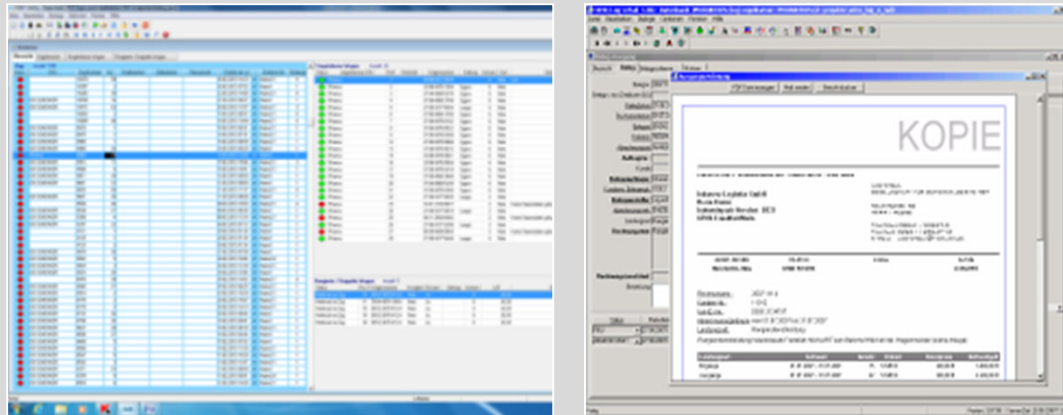

- ✓ **Visual inspection**
- ✓ **Easy evidence**  
Using archived data
- ✓ **Cost savings**  
Claims for damages

# 02

ASE Technology - Modul description

## AUTOMATED TOC MATCHING

Automated electronic matching of transits captured by ASE NumberCheck with TOC reservations and automated billing system

GUI – Trabsy user interface

- Matches reported TOC data
- Mobile end devices for determining down times

- ✓ **Efficiency gains**
- ✓ **Fully automated**
- ✓ **Sales increas**
- ✓ **Cost reduction**

# 02

ASE Technology- Modul description

## NUMBERCHECK – SOFTWARE FEATURES

Suche Vergleich Status

Code  
Von 10.10.12 11:17  
Bis 10.10.12 11:17  
Tor Track 1  
Richtung Einfahrt

Zeit	Tor	Richtung	Status
25.05.12 07:06:14	Track 1	Ausfahrt	
24.05.12 16:26:50	Track 1	Ausfahrt	
24.05.12 14:37:06	Track 1	Ausfahrt	
24.05.12 13:45:31	Track 1	Einfahrt	
24.05.12 10:04:32	Track 1	Einfahrt	
24.05.12 08:41:01	Track 1	Einfahrt	
24.05.12 07:28:28	Track 1	Einfahrt	
23.05.12 07:25:18	Track 1	Einfahrt	

Video-based recording of train or truck passes with one or more IP video cameras

Transits are recorded and archived

Parallel automatic recognition of character types

Stored data (videos and recognized characters) can be viewed via a comfortable user interface

Search functions for characters

Complete video sequences available

Damage detection

07 | ABOUT US / CONTACT

# 03

Train data detection / Wayside Train Monitoring

## CHECKPOINT: TRAIN DATA MEASURING PORTAL

Recognition/capturing train data

Measuring train characteristics

Axles detection

Clearance profile

Video recording

Thermal profile

RFID Transponder

interior surveying

# 03

### HIGHLIGHTS AND FUNCTIONS

Measuring portal in light frame construction

Various assembling possibilities (also under bridges)

State-of-the-art sensor components, long service life

Reliable detection at all weather conditions

Search for pictures by train number, date, time, alarm, event

Image archiving and verification in case of incident or damage

Data transfer to control consoles and mobile devices

Integration / Combination with other systems

## MEASURING AND DETECTION MISCONDITIONS

### Measuring Train characteristics:

- Speed
- Direction
- Axles detection
- Wagon detection (position, type, train formation)
- Load detection

### Detection misconditions:

- Clearance profile (antenna, loose covers, tension belts, oversized cargo, etc.)
- Thermal profile
- Tracking of hot-running, fixed-brake and flat wheel detection
- Wheel load, overriding of buffers
- and more

### Measuring force on contact wire

- Wear / breakage of the abrasive strip
- Integration of known sensors

Example: Detection of a high standing antenna

# 03

## MEASURING CLEARANCE GAUGE - COMPONENTS

Optical high-end sensors

**Detection clearance profile violation in width and height:**  
min. width of 40 mm.  
Speed up to 60 m/sec.

**Damage protection**  
for bridges, tunnels and infrastructure

**Reliable measuring**  
- intelligent image and laser analyzes  
- Outdoor suitability / sun protection  
redundant detection

# AUTOMATIC AS-IS DETECTION

Flange closed

Brake lever position: Wagon loaded/empty

Damage label available?

01 | ASE – WHO WE ARE

06 | SECURITY IN STATION AREA

07 | ABOUT US / CONTACT

# 04

## Pantograph-Monitoring

### DETECTION CONTACT STRIPE

Optical detection

Position of  
pantograph

Wear of contact  
stripe

Defects of contact  
stripe

At day  $V = 205$  km/h

At night  $V = 165$  km/h

# PICTURES OF DEFECT PANTOGRAPHS / REASONS

**Damage by:**

Wear

Accident

Storms / bad weather

# 04

## ANALYSIS FOR CONTACT STRIPES

Avoidance of damage caused by worn or broken out carbon layers with the contact wire

Measurement of force on contact wire  
Optimization the pressure of the contact strip against the contact wire -> wear avoidance

**The measuring system provides all the parameters required for evaluation:**

Detection train data (Length and speed up to 220 km/h)

Detection pantograph types

Position of the grinding bar relative to the longitudinal and transverse axis

Missing or deformed contact stripes

Thickness of the coal layer over the entire width (degree of wear)

Differentiation of carbon or copper abrasive strip

Differences in position and width (outbreaks)

Contact wire increase / increase in contact pressure

Automatic damage analysis

High speed image recording

## Measuring of:

- Uplift of contact wire
- Speed of wind
- Ambient temperature

Calculation  
of deviation

= f

(Uplift, wind,  
pantograph type,  
etc ...)

Reference at Network Rail in Great Britain

Backlight for optical contrast

Movement and position of the contact wire.

The Uplift sensor is mounted on a portal.

Detects damage to the pantograph

## 04

## Pantograph-Monitoring

**PANTOSPECT – SOFTWARE FUNCTIONS**

Manage multiple units via the web interface

Status display of all connected units (standby, error states)

Central storage and browsing of all images (date, time, train...)

Graphical representation pantograph position

GPS informationen available

Interface (SNMP) for automatic signal / alert

The screenshot displays the 'Pantograph Inspection Unit' web interface. It features a navigation menu with 'Browse', 'Camera settings', and 'Unit settings'. A calendar for June 2010 is visible on the left. The main data table lists inspection records with columns for Date, Time, #Pantos, Speed, and Length. Below the table, a graphical representation shows the pantograph's position on a train, with a scale from 0m to 445.5m. A camera view at the bottom shows the actual pantograph in operation. The interface also includes a status bar at the bottom indicating 'Transferring data from localhost...'.

Date	Time	#Pantos	Speed	Length
2010-06-21	09:15:07	3	251km/h	446m
2010-06-21	09:18:15	3	251km/h	446m
2010-06-21	09:19:49	3	251km/h	440m
2010-06-21	09:21:23	3	251km/h	446m
2010-06-21	09:22:57	3	251km/h	446m
2010-06-21	09:24:31	3	251km/h	446m
2010-06-21	09:26:05	3	251km/h	446m
2010-06-21	09:27:39	3	251km/h	446m
2010-06-21	09:29:13	3	251km/h	446m

Detection damage and wear

Identification of pantographs in the database

Automatic alerting

Quick search

The screenshot shows a web browser window titled 'Pantograph - Mozilla Firefox' with the URL 'http://192.168.0.123/'. The page is titled 'Pantograph Inspection Unit' and includes a 'Unit: Unnamed unit' and 'User: admin' status bar. Below the title, there are tabs for 'Browse', 'Camera settings', and 'Unit settings'. An 'Info: Train is passing.' message is displayed. The main content is a table with columns for 'Date', 'Time', '#Pantos', 'Speed', and 'Length'. A calendar for June 2010 is visible on the left side of the table.

Date	Time	#Pantos	Speed	Length
2010-06-21	09:18:13	3	251km/h	446m
2010-06-21	09:19:49	3	251km/h	446m
2010-06-21	09:21:23	3	251km/h	446m
2010-06-21	09:22:57	3	251km/h	446m
2010-06-21	09:24:31	3	251km/h	446m
2010-06-21	09:26:05	3	251km/h	446m
2010-06-21	09:27:39	3	251km/h	446m
2010-06-21	09:29:13	3	251km/h	446m
2010-06-21	09:30:47	3	251km/h	446m

### Data transmission:

All measured data and limit value exceedances are available for the operator's network.

Connection via TCP/IP, PSTN, ISDN, GSM, UMTS, etc. can be realized flexibly

The measurement parameters to be transmitted are flexibly adapted to the available data rates.

# 04

## Pantograph-Monitoring

### REFERENCE: INFRABEL, BELGIEN

- Detection of speed by wheel sensors
- Activation of optical sensors
- Detection of beginning and end of train and pantograph positions
- Real-time information processing
- Calculation of trigger time for camera
- Combination of measurement and image data in the database
- Storage of pantograph image, date and time, train speed, train length and pantograph position
- Recording of complete train as M-JPEG compressed video stream (relevant JPEG images can be extracted)

#### Detection components:

Power supply

Timing Controller

Camera

Mini PC

Wheel sensors

GPS modul

Installation space for additional network components

Metal housing with heater and filter ventilators

Headlights right and left for:

Flexible and optimal lighting

Avoidance of shadowing of the overhead line suspension system

03 | CHECKPOINT – MEASURING PORTAL

04 | PANTOGRAPH – MONITORING

**05 | TUNNEL MOUTH SURVEILLANCE**

06 | SECURITY IN STATION AREA

07 | ABOUT US / CONTACT

# 05

Train data detection and monitoring systems

## TUNNEL MOUTH SURVEILLANCE

Detection persons and objects

Direction detection

Detection of camera manipulation

Detection of loss of video signal

People counting / loitering

Object tracking and classification

Virtual fence

## PTZ Pan/Tilt/Zoom

- Manual or network control
- Preset on event
- Automatic PTZ tracking
- Zoom to marked area

## Alerting

- Alert E/A, mobile devices
- E-Mail notification
- FTP, TCP

## Integration

- Server API / SDK
- Events via TCP/IP
- Support OPC data access

Area of surveillance

Security in station area

## VIDEO SYSTEMS FROM ASE ENSURE MORE SECURITY IN PUBLIC PLACES

---

**Recording/Image data storage**

---

**Real time analysis of video data**

---

**Event controlled recording**

---

**Classification of objects and people**

---

**Fully automatic tracking of persons and vehicles**

---

**Vehicle detection**

---

**Alerting**

---

**Definable motion detection**

---

**Change reports (e. g. parked objects, changed surfaces, graffiti)**

---

**Panic detection**

---

**Data access via Internet**

---

# 06

Security in station area

## STATION VIEW - FEATURES

platform surveillance

train crossings

suicide suspects

panic detection

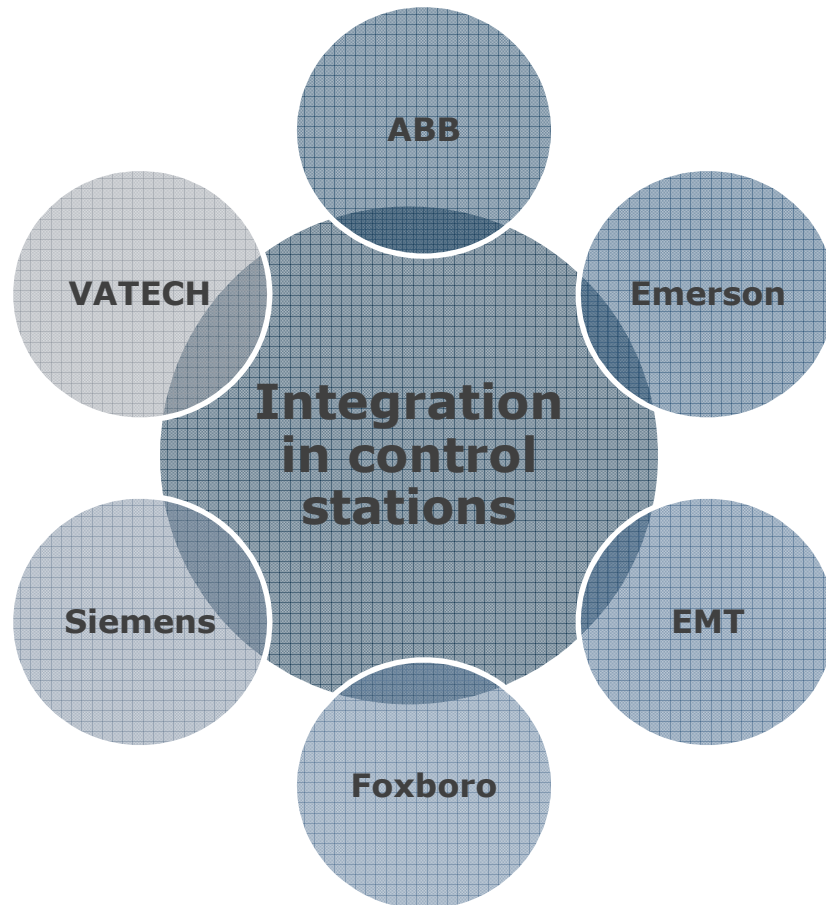

Railway station Baden (AT)

- Real-time analysis of video data
- Detection of abnormal activities and safety-relevant situations
- Automatic dome camera control
- Mobile data available via Internet
- History pictures and live recordings are available to external emergency personnel via the Internet
- Connection to VMS (Video Management Server)

# INTERFACES FOR INTEGRATION IN CONTROL STATIONS

## OUR SYSTEMS CREATE MEASURABLE SUCCESS

- ✓ **Smart image processing**  
Highly efficient OCR algorithm, matching captured information with database
- ✓ **Archiving & remote access**  
Accessing information by wagon number, date, time, etc., using remote interfaces from anywhere
- ✓ **Universal interfaces**  
Standardised communication using any logistics or operating system via WiFi, UMTS, GPS, etc.
- ✓ **Tailored software**  
Visual inspection of captured arrivals using Stitching module
- ✓ **Comprehensive process automation**  
Captures down times
- ✓ **Extensive shunting support**  
Checks shunting order / advance information on shunting; follows wagon movements across the rail network

- ✓ **Enormous contributions to success with low investment volume**  
Large profit and savings potential
- ✓ **Our systems shine through fastest operational readiness**  
The fastest solution on the market - without a track closing
- ✓ **Flexibility of a special design**  
We offer tailor-made solutions for every project and every customer
- ✓ **Many years of experience & comprehensive engineering knowledge**  
Our solutions are well thought-out, innovative and highly efficient
- ✓ **We have strong partners in industry and research**  
Our network is an essential part of our success
- ✓ **Software-Updates regularly**  
Stay up to date with us at all times
